

PRODUCT BROCHURE

Smart Packaging Solutions

FLEXIBLE PACKAGING · MATERIALS · INKS · ADHESIVES | DUBAI, UAE

01

Stretch Film

Hand & machine grade

02

Adhesives

Solvent based & solventless

03

Printing Inks

Solvent based & water based

04

Zippers

Easy, slider, pocket & hook-to-hook

05

Degassing Valves

One-way valves for coffee pouches

PVR PACKAGING

Your Trusted Partner
for Complete Flexible
Packaging Supply

MISSION

Smart sourcing, simplified.

To be the single, reliable source for flexible packaging materials — film, inks, adhesives, pouches and fitments — so customers can focus on what they pack, not on chasing suppliers.

VISION

The region's trusted packaging partner.

To be recognized as the most dependable flexible packaging supply partner in the region — known for consistency, technical fit, and materials that perform.

IN THIS BROCHURE

01	Stretch Film	Hand & machine grade	03
02	Lamination Adhesives	Solvent based & solventless	04
03	Printing Inks	Solvent based & water based	05
04	Zippers	Easy, slider, pocket & hook-to-hook	06
05	Degassing Valves	One-way valves for coffee pouches	07

WHY PVR

Multi-Manufacturer Sourcing

Leading producers through one supplier, so you are never dependent on a single source.

Best Market Pricing

Competitive, volume-backed pricing through our multi-vendor network.

Consistent Quality

Materials that perform the same way from batch to batch and roll to roll.

Technical Support

Help matching the right material to your substrate, structure and machine.

01

Stretch Film

Hand & Machine Grade

PVR Packaging supplies high-cling LLDPE stretch film engineered for reliable load containment — available in hand-roll grade for manual wrapping stations and machine grade for automated pallet wrappers, so your warehouse and logistics team always has the right fit for the job.

STRETCH FILM
Hand / Machine Grade

STRETCH FILM
Hand / Machine Grade

Why PVR for Stretch Film

Hand & Machine Grades

One supplier for both manual wrapping rolls and high-speed machine-grade film, matched to your throughput and wrapping method.

Pre-Stretch Efficiency

Optimized gauge and stretch ratio mean more pallets wrapped per roll — lower cost per wrap, not just per roll.

Technical Support

We help you select the right micron thickness and stretch % for your load type and wrapping equipment.

High Cling, High Puncture Resistance

Engineered for strong load stability and tear resistance, protecting goods through transit and storage.

Multi-Manufacturer Sourcing

Access to multiple film producers through one desk, giving you competitive pricing without compromising on quality.

Let's talk about your next run.

02

Lamination Adhesives

Solvent Based & Solventless

Sourced from multiple leading global manufacturers, PVR Packaging supplies lamination adhesives engineered for strength, speed, and compliance — giving converters the flexibility to choose the right chemistry for every structure, without being locked to a single brand.

Solvent Based

Lamination adhesives

Solventless

Lamination adhesives

LAMINATION ADHESIVES

Solvent Based / Solventless

Why PVR for Adhesives

Multi-Manufacturer Sourcing

Access to leading global adhesive brands through one supplier, so you're never dependent on a single source or affected by one factory's delays.

Consistent Quality

Every batch meets bond strength, cure time, and food-safety compliance standards before it reaches your line.

Best Market Pricing

Competitive, volume-backed pricing through our multi-vendor network — we negotiate, you save.

Technical Support

Our team helps you match the right adhesive — solvent-based or solventless — to your substrate, barrier needs, and production speed.

03

Printing Inks

Solvent Based & Water Based

PVR Packaging supplies solvent-based and water-based printing inks for rotogravure and flexographic presses, sourced from multiple leading manufacturers. Printers and converters get strong colour, clean printability, and reliable adhesion across film substrates, without being tied to a single ink brand.

PRINTING INKS

Solvent Based / Water Based

PRINTING INKS

Solvent Based / Water Based

Why PVR for Inks

Solvent & Water-Based Range

One supplier for both chemistries, covering surface printing and reverse printing for lamination.

Shade Consistency

Batch-to-batch colour control, so repeat jobs match the approved shade.

Best Market Pricing

Competitive, volume-backed pricing through our multi-vendor network.

Multi-Manufacturer Sourcing

Access to leading ink producers through one desk, so your press is never waiting on a single factory.

Substrate Compatibility

Grades matched to BOPP, PET, PE, and other films for strong adhesion and bond strength after lamination.

Technical Support

Our team helps you select the right ink system for your press, substrate, and end use, including shade matching and viscosity guidance.

04

Zippers

Easy, Slider, Pocket & Hook-to-Hook

PVR Packaging supplies reclosable zipper profiles for flexible pouches, sourced from multiple leading manufacturers. Pouch makers get one supplier for every closure style, with zippers that seal cleanly to the laminate and keep opening and closing reliably for the consumer.

SLIDER ZIPPER
Slide to Open & Close

PVR
PACKAGING
HOOK-TO-HOOK
ZIPPER
Velcro Type Closure

Our Zipper Range

Easy Zipper (Press-to-Close)

The standard reclosable profile for food, coffee, and snack pouches.

Slider Zipper

A slider clip opens and closes the pouch in one easy pull, suited to larger and premium packs.

Pocket Zipper

Applied on the front face of the pouch with a tear-off strip, giving a wide opening for detergent, pet food, and bulk packs.

Hook-to-Hook Zipper (Velcro Type)

Closes with light pressure and no precise alignment, and keeps working with powders and granules.

Why PVR for Zippers

Complete Range, One Supplier

All four zipper styles from one desk, so you can match the closure to each pouch format.

Multi-Manufacturer Sourcing

Access to multiple zipper producers, so supply does not depend on a single factory.

Seal Compatibility

Profiles matched to your sealant layer for strong, leak-free sealing on the pouch machine.

Consistent Quality

Uniform profile dimensions and reliable open-and-close performance from roll to roll.

Best Market Pricing

Competitive, volume-backed pricing through our multi-vendor network.

Technical Support

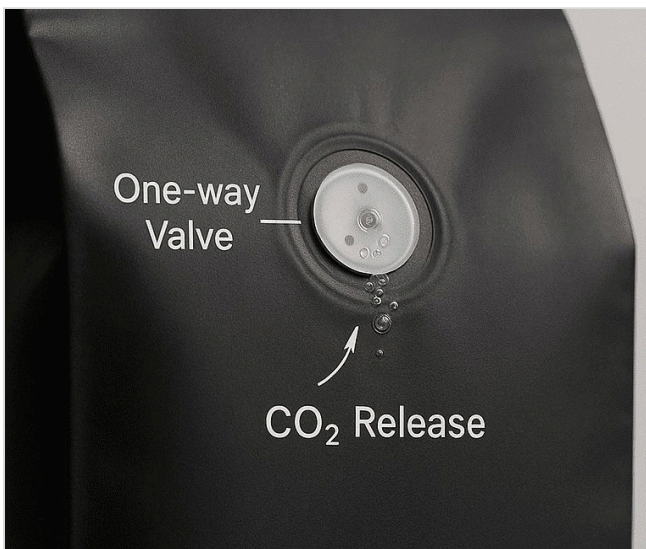

Our team helps you select the right zipper type, width, and material for your pouch structure and machine.

05

Degassing Valves

One-Way Valves for Coffee Pouches

Freshly roasted coffee releases carbon dioxide for days after packing. PVR Packaging supplies one-way degassing valves that let this gas escape while keeping oxygen and moisture out, so pouches do not bloat or burst and the coffee keeps its aroma and freshness on the shelf.

DEGASSING VALVE
One-Way Valve for Coffee Pouches

DEGASSING VALVE
One-Way Valve for Coffee Pouches

Why PVR for Degassing Valves

True One-Way Performance

Releases CO₂ from inside the pouch and closes again to block outside air.

Whole Bean and Ground Coffee

Valve options with a filter keep fine coffee powder from blocking the valve.

Multi-Manufacturer Sourcing

Access to multiple valve producers through one desk, with competitive, volume-backed pricing.

Protects Freshness and Aroma

Keeps oxygen away from the coffee, so it reaches the consumer as the roaster intended.

Seal Compatibility

Valves matched to your pouch laminate for a strong, leak-free seal on the pouch machine or valve applicator.

Technical Support

Our team helps you select the right valve type and position for your pouch size and structure.

Let's talk about your next run.
